

Teradici Cloud Access Software via 10ZiG Thin Clients

Seamless Endpoint Connectivity to Teradici CAS and Amazon WorkSpaces Deployments

10ZiG Endpoints and The 10ZiG Manager™ Software are optimized for cloud deployments and enable end users to experience all benefits of Teradici Cloud Access Software.

Teradici Thin Client Access Support with the Power, Speed, and Performance of 10ZiG

As a provider of PCoIP® VDI endpoint solutions and a longstanding Teradici partner, 10ZiG supports Teradici Cloud Access Software (CAS) with Teradici Thin Client Access (TCA) via Windows PCoIP Thin Client endpoint devices. TCA provides access to any Teradici CAS deployment on-premises, or in the cloud, and to Amazon WorkSpaces. The 10ZiG Thin Client, Windows 10 IoT 6110, is a perfect fit for the most graphics-intensive workloads and PCoIP Ultra performance enhancements. This power-user focused endpoint supports high-demand workers with support for up to four monitors and 4K/UHD resolution, and it is centrally managed with the always-free, cloud-enabled - The 10ZiG Manager. The AMD Ryzen Embedded V1202B core 6110 endpoint also offers up to 32 GB DDR4 RAM and up to 8 USB ports including USB 3.0, as well as a Fiber option. Engineers, designers, and any high graphic and video demand environment will benefit from its cloud-based performance, including media and entertainment, healthcare, financial services, and government.

10ZiG Remote Endpoints & Management

Flexible Configuration & Deployment

Easy centrally-managed configurations and deployments of hardware, locally or via The 10ZiG Manager™ software, with automated groups and management features.

Remote User Functionality

10ZiG Windows 10 IoT Thin Client endpoints and The 10ZiG Manager™ Software with Cloud capabilities create a cutting-edge, remote-working and in-office solution.

FREE Enterprise Management

The 10ZiG Manager™ centralized management software connects in the Cloud and manages large volumes of endpoints in locations across the country or around the world.

10ZiG Technology – Power. Speed. Performance.

Management Made Easy

Automated deployment & management with The 10ZiG Manager™ - centralized management software that is always FREE with no user or device limit.

In-House Development Ahead Of The Curve

Solely focused in-house endpoint OS vendor. Always at the forefront of EUC, VDI, and Digital Workspaces development with expertise in underlying Windows-based technologies.

Support When You Need It

Personalized local, Teradici-certified support. An understanding not just on 10ZiG endpoints, but also EUC, VDI, and Digital Workspaces environments.

Software With Unrivalled Performance

Provides speedy and easy to use UI for users to access their EUC, VDI, and Digital Workspace environments. It's all about easy to use, easy to configure, and easy to manage.

Hardware Without Compromise

Performance hardware designed from the ground-up for ever changing experience demands. Assembled locally with the highest quality stateless components.

Service Like No Other

No-obligation test devices, including personalized POC follow-up, presale support, local assembly, and custom build.

Fully Customizable Solutions

10ZiG Mission of our underlying commitment to providing custom-tailored solutions, which is a level of service that simply doesn't exist elsewhere.

Hassle-Free Warranty

Market leading 3-Year Advance Exchange Warranty, including software support and upgrades.

About Teradici

Teradici is the creator of the PCoIP remote display protocol, which delivers desktops and workstations from the data center or public cloud to end users with the highest levels of security, responsiveness, and fidelity. Teradici Cloud Access Software (CAS), which won an Engineering Emmy from the Television Academy in 2020, powers the most secure remote solutions with unparalleled performance for even the most graphics-intensive applications. Teradici technology is trusted by leading media companies, design houses, financial firms and government agencies and is deployed to more than 15 million users worldwide.
